

ENGINEERINGCROSSING™

THE LARGEST COLLECTION OF ENGINEERING JOBS ON EARTH

The Fastest-Growing Engineering Job Board, EngineeringCrossing, Now Features More than 68,000 Jobs

February 18, 2008

Pasadena, CA — EngineeringCrossing, the site dedicated exclusively to engineering professionals, has continued its rapid growth and now features upwards of 68,000 jobs. Providing access to the largest collection of engineering job listings in the world, EngineeringCrossing is the most efficient, user-friendly, and precise engineering job-search tool available.

Designed to help talented professionals find the perfect engineering openings for them, EngineeringCrossing employs a staff of hundreds of experienced researchers who constantly monitor the hiring needs of more than 250,000 employer websites, job boards, and trade-organization websites to provide users access to every available job listing. The company's programmers continuously add new domains to EngineeringCrossing's job-tracking system to ensure that every time a job search is conducted, new job listings — that haven't been seen before — are available.

More importantly, EngineeringCrossing does not charge employers to post jobs, which means that every single job — whether from an established corporation or a rapidly expanding startup — is available to users.

Supported by the swift expansion of its parent site, EmploymentCrossing — which currently features more than 900,000 active job listings and will soon be passing 1 million — EngineeringCrossing has added more than 13,000 jobs to its database within the past seven days alone. By proactively searching for job openings, EngineeringCrossing ensures that its collection of jobs not only grows exponentially but does so at an increasingly breakneck pace.

“When EngineeringCrossing first launched, it was my goal to ensure that it would quickly become the most comprehensive job board available for engineering professionals,” said CEO A. Harrison Barnes. “Amazingly, EngineeringCrossing is less than one year old and has already achieved that goal. Still, in the coming months and years, we will continue to grow and expand to guarantee that we find every available job listing and make them available to our users.”

As stated above, this exciting website is affiliated with EmploymentCrossing (www.employmentcrossing.com), the main hub for a growing family of industry-specific job-search sites that launched on April 9, 2007.

Currently, job seekers can visit EmploymentCrossing to sign up for EngineeringCrossing's services.

The EmploymentCrossing group of websites is on the fast track to expansion with more Crossing sites launching weekly. EmploymentCrossing will continue to focus exclusively on providing the most extensive range of available jobs from every corner of every sector. This spring watch for the launches of SciencesCrossing, InsurCrossing, BusinessAnalystCrossing, and RECrossing, among others.
