

SCIENCESCROSSING™

THE LARGEST COLLECTION OF SCIENCE JOBS ON EARTH

SciencesCrossing Offers World's Largest Collection of Science Jobs

January 31, 2008

Pasadena, CA—Searching for the right professional scientific opportunity is now faster, more efficient, and easier than ever, thanks to the launch of the dynamic new website SciencesCrossing. As part of EmploymentCrossing's growing family of industry-specific job-search sites, SciencesCrossing is designed to help science professionals find jobs that match their specific career goals and interests.

SciencesCrossing features the world's largest collection of science jobs from across the U.S. and provides the most accurate and extensive collection of science positions anywhere. Job seekers can now visit SciencesCrossing to search for opportunities that meet their individual requirements, including location and specialty.

SciencesCrossing's staff of highly experienced researchers extensively monitors the hiring needs of more than 750,000 employers across the country. These specialists are dedicated to adding countless new science job opportunities to the site each day, including exclusive notices not posted on general employment sites.

"We're excited to welcome SciencesCrossing into the growing family of Crossing employment sites. We hope more professionals will use our innovative online service to find positions that match their unique job-search needs," said CEO A. Harrison Barnes.

In addition to providing an extensive range of job listings, SciencesCrossing features valuable original content, including in-depth articles and analysis of the people, companies, and stories affecting various scientific industries.

The development of the Crossing employment sites has been inspired by the success of LawCrossing which features the largest collection of active legal jobs in the world, including more than 10,000 positions at top law firms, corporations, public-interest organizations, and government offices throughout the U.S.

Since its launch in July 2003, LawCrossing has become the world's largest legal-career-placement website. The company is another brainchild of Barnes, who also founded the hugely successful parent company of the Crossing employment sites, Juriscape, in 2000.
