

SQLCrossing Is Launched by EmploymentCrossing with 4,000-Plus SQL Job Openings

November 17, 2008

EmploymentCrossing, one of the world's largest job-board operators, has recently launched SQLCrossing. As part of the EmploymentCrossing job-site franchise, SQLCrossing is seeking to list every SQL job in the United States in one place.

Pasadena, CA — An SQL professional is responsible for the most of the query building and structuring of a database which also includes recoverability issues, creating and testing backups, integrity, verification controls, and security. The SQL professional also focuses on maintaining records, updating the relevant information, and efficient utilization of the database. SQLCrossing, the newly launched job board for SQL professionals, aspires to list a comprehensive collection of researched job openings. The [SQL job site](#) features jobs from every SQL job opening, from job boards to employer websites in the US. SQLCrossing aspires to transform the careers and lives of thousands of SQL professionals, every week and every day.

According to the US Bureau of Labor Statistics, the average starting salaries for students who earn a diploma in database programming varies, depending on location and level of responsibility. A [job in SQL programming](#) is highly sought after and always in demand as predicted by employment trends. The economic outlook and growth potential in this industry is also very good, according to the report. The Bureau of Labor Statistics also states that competition for jobs in this category is very high. Hence, those with practical [experience in SQL programming](#) and at least a bachelor's degree in computer engineering or computer science should have the best opportunities.

"In this market it is extremely hard to get a job with a recruiter, and recruiters typically work with very few companies," says A. Harrison Barnes, founder and CEO of SQLCrossing. "Job openings that are not widely known or publicized are the easiest jobs to get."

SQLCrossing posts jobs in every city in the US. Here is the list of some cities where you can find SQL jobs.

- [SQL Jobs in Arlington, Virginia](#)
- [SQL Jobs in Atlanta, Georgia](#)
- [SQL Jobs in Austin, Texas](#)
- [SQL Jobs in Bellevue, Washington](#)
- [SQL Jobs in Boston, Massachusetts](#)
- [SQL Jobs in Bothell, Washington](#)
- [SQL Jobs in Charlotte, North Carolina](#)
- [SQL Jobs in Chicago, Illinois](#)
- [SQL Jobs in Cincinnati, Ohio](#)
- [SQL Jobs in Cleveland, Ohio](#)
- [SQL Jobs in Dallas, Texas](#)

SQLCrossing was launched to assist SQL professionals with sorting out the opportunities that they may not find

Press Release

out about otherwise. Unlike other job boards, the site focuses solely on SQL jobs, and it doesn't charge employers to post jobs.

"SQLCrossing is a research company that works for job seekers," Barnes says. "We seek to connect job seekers to employers." Barnes also emphasizes that SQLCrossing is committed to finding new sources of jobs daily.

"There is an astonishing number of [SQL job openings](#) out there. We want to find them all," he says.

SQLCrossing charges \$29.95 a month to view its job-opening research. As part of the site's launch special, however, SQLCrossing is offering a free, seven-day trial to allow job seekers to familiarize themselves with the service.
